Greetings 1957

Greetings to all our iris friends, and many thanks for the orders we received from you last year. The rains have finally come to this section of the country and there is a buoyant feeling among all who must have rain to make good crops. It should be a good year for you to plant those extra iris you have always wanted.

You will find many new varieties listed and of course these scarce varieties might not be available late in the season. We advise July planting as the best: we believe the plants get a better start, so you can count on a larger per cent of blooming the first year.

Read over the following bonuses carefully. We could make up "collections," but by allowing you a bonus on anything in the catalog you can make collections of your choice. You buy only what you want; and all at reduced prices.

Orders from \$5.00 to \$9.99 select 25% more iris value.

Orders from \$10.00 to \$19.99 select 30% more iris value.

Orders from \$20.00 to \$49.99 select 40% more iris value.

Orders from \$50.00 to any larger amount select 50% more iris value.

Culture

It is a mistake to assume that because iris are extremely hardy that they will not respond to a careful cultural plan. Above all, iris must have full sun and good drainage—given such conditions many of your iris troubles will be averted. Keep all dead leaves and litter removed—these breed disease. Iris will thrive in any ordinary garden soil. A good plan for the fertilizing of iris is to apply gypsum or lime in the spring, superphosphate after blooming, and a feeding of bone-meal in the fall. Larger blooms and more vigorous plants will be your reward.
